Mohandas Karamchand Gandhi (/ ' g ɑ: n d i, ' g æ n d i /; GAHN-dee; 2 October 1869 – 30 January 1948) was an Indian lawyer, anti-colonial nationalist and political ethicist who employed nonviolent resistance to lead the successful campaign for India's independence from British rule, and to later inspire movements for civil rights and freedom across the world.

Mahatma Gandhi - Wikipedia

Fig. 1.44. Functions of the integumentary system.. The integumentary system is an organ system consisting of the skin, hair, nails, and exocrine glands. It functions to waterproof, cushion, and protect the deeper tissues, excrete wastes, and regulate temperature, and is interspersed with sensory receptors to detect pain, sensation, pressure, and temperature.

Integumentary System - an overview | ScienceDirect Topics

Affected individuals fall into three groups: (1) people involved directly in agricultural food production (e.g., farmers); (2) people involved in the rest of the food system (e.g., processing, manufacturing, food service, and retailing); and (3) consumers. Food production, processing, and availability also can affect community-level measures, such as economic growth and social
