The present research on the dynamic fracture mechanics behavior of the pipeline provides a necessary supplement for the test. ... core-outrigger and stiffness of dampers have substantial influence on structural damping, particularly within the range smaller than 1, 10 and 4, respectively, but the presence of properly designed negative stiffness ...

Aluminum alloys have been the dominant materials used for airframe structures until the increasing trend in the use of polymer-matrix composites, as shown in Table 4.1 [1,2]. The Boeing 787 and Airbus A350 are built with
