Signs and symptoms. The signs and symptoms of brain tumors are broad. People may experience symptoms regardless of whether the tumor is benign (not cancerous) or cancerous. Primary and secondary brain tumors present with similar symptoms, depending on the location, size, and rate of growth of the tumor. For example, larger tumors in the frontal lobe can cause changes in the ability to think.

Brain tumor - Wikipedia

However, there is silver lining in the management of early ARDS using these agents. There is distinct advantage of corticosteroids in improving organ function score, lung injury score, and oxygenation which result in reduction in duration of mechanical ventilation requirement and ICU stay, although only one study showed mortality benefits.
