The demand driven principle proposes that our focus should be driven by the needs (demand) of those we serve. Demand will tell us what knowledge to capture and what knowledge has value, and reuse of the knowledge we will validate that knowledge in the Solve Loop.

Demand Driven - Consortium for Service Innovation
Finding better ways to break through. Developing a powerful innovation capability is no easy task. In fact, our recent studies show that there is no long-term correlation between the amount of money a company spends on its innovation efforts and its overall financial performance. Instead, what matters most is a company's openness to new ideas, its ability to manage product innovation from ...
