PC Answers was a computer magazine published in the United Kingdom by Future plc. It was notable for its focus on the technical side of computing. It ran several series of articles on overclocking, a "Danger! Don't Try This At Home!" section which reviewed hardware projects such as the Stone Soupercomputer and Tomohiro Kawada's dual Celeron PC.

I told AnswersBy PC Support that my PC was not booting up. They guaranteed they could fix it and asked me for credit card information to charge a total of \$99.99. After several failed attempts to reboot my PC this company told me it was a "Hardware Problem" and I needed to take it to a local repair shop.

Polymerase chain reaction (PCR) is a method widely used to rapidly make millions to billions of copies of a specific DNA sample, allowing scientists to take a very small sample of DNA and amplify it to a large enough amount to study in detail. PCR was invented in 1984 by the American biochemist Kary Mullis at Cetus Corporation. It is fundamental to much of genetic testing including analysis of ...
