project objective. These impacts can be both positive and negative; i.e., opportunities and threats. The project objectives are numerous, e.g. the schedule, cost, quality and scope. For each identified risk, the impact and probability are assessed.

Impact and Probability in Risk Assessment - apppm

The Risk Impact/Probability Chart provides a useful framework that helps you decide which risks need your attention. How to Use the Tool. The Risk Impact/Probability Chart is based on the principle that a risk has two primary dimensions: Probability – A risk is an event that "may" occur. The probability of it occurring can range anywhere from just above 0 percent to just below 100 percent.
