Orthographic projection (sometimes referred to as orthogonal projection, used to be called analemma) is a means of representing three-dimensional objects in two dimensions. It is a form of parallel projection, in which all the projection lines are orthogonal to the projection plane, resulting in every plane of the scene appearing in affine transformation on the viewing surface.

Radiance (HDR) is a 32-bits-per-channel file format used for HDR images. This format was originally developed for the Radiance system, a professional tool for visualizing lighting in virtual environments. The file format stores the quantity of light per pixel instead of just the colors to be displayed onscreen.

Just say the word, I keep thinking. I have been waiting over a decade to hear Chloë Grace Moretz say the phrase, "I am queer." I'm not trying to out her. And trust me, I'm not one of those pervs with their gross countdown clocks waiting to see when a female celebrity is "legal" — I watched those "fans" bedeviled a lot of female performers in the past, including Mary-Kate and ...
