The programming look of the PLC required that it be easily understood and used by maintenance electricians and plant engineers. As relay-based control systems evolved and became more complicated, the use of physical component location wiring diagrams also evolved into the relay logic being shown in a ladder fashion.

The drum beat is a core element of hip hop production. While some beats are sampled, others are created by drum machines. The most widely used drum machine is the analog Roland TR-808, which has remained a mainstay for decades. Digital samplers, such as the E-mu SP-12 and SP-1200, and the Akai MPC series, have also been used to sample drum beats. Others yet are a hybrid of the two techniques ...

A computer is a machine that uses electronics to input, process, store, and output data. Data is information such as numbers, words, and lists. Input of data means to read information from a keyboard, a storage device like a hard drive, or a sensor. The computer processes or changes the data by following the instructions in software programs. A computer program is a list of instructions the ...

The drum provided reasonably large quantities of medium-speed memory and was used to supplement a high-speed acoustic or electrostatic memory. In 1949, the Manchester computer was successfully equipped with a drum memory; this was constructed by the Manchester engineers on the model of a drum developed by Andrew Booth at Birkbeck College, London.
